

Typ: RTBSB-001.910/2

Art.-No.: MA012100

Features:

Raumtemperaturregler, mechanisch, AP, 5...30°C, Inneneinstellung, Wechsler, 24VAC, 1(1)A, reinweiß ähnlich RAL 9010

Application:

Control or monitoring of temperatures in closed spaces. Suitable for all heating systems.

Valve actuator: normally closed. If normally open heating valves are available, they should be placed at the cooling output of the changeover switch (toggler).

Up to a maximum of 10 actuators for valves can be connected (normally closed, NC); with a toggler, on the NO contact, up to 5 units (in this context, please check the switching capacity listed in the technical specifications).

Installation note: Owing to the existing wiring space in the controller itself, installation on a flush-mounted socket is recommended, but it can also be performed on a plane, non-conducting substrate.

Explanations of technical terms can be found in the annexe to the product catalogue or at www.alre.de.
